

CAPABILITY STATEMENT

ENERGY MANAGEMENT AND AUDITS FOR PRIMARY AND SECONDARY SCHOOLS IN AUSTRALIA

Enhar can undertake energy audits especially designed for Australian Primary and Secondary Schools. We can help your school reduce its energy use, thereby becoming more sustainable. Energy audits can also help inform the broader Environmental Sustainability Plan for your school. This will include waste and water management.

With the increased awareness of climate change and increasing costs of energy, Schools are looking for opportunities to reduce energy use and harmful greenhouse gas emissions, as well as reducing energy costs. Energy efficiency and conservation are the first steps in reducing energy costs and are central to any sustainable energy program. Energy efficiency and conservation will allow for the provision of energy services to your School, carefully using the precious energy resources available on Earth.

An Energy Audit is also a good starting point for a Solar Schools programme, we include an assessment of solar panel opportunities for your roofs.

Enhar can also assist your school in building a Green Team. This is a team of staff and students who are keen to make your school sustainable. We will help them understand the sometimes confusing energy related issues and communicate this to other staff and students. Schools may also be eligible for government assistance. Enhar can help your school find these opportunities.

Enhar services for Schools:

- School Energy Audits
- Energy demand reduction
- Energy Management Plans
- National Schools Solar Program
- Staff and Student energy awareness training
- Accessing Government Funds

Please contact us to find out more about how we can assist your School to reduce energy consumption and tackle Climate Change!
