INTRODUCING:

THE COMPREHENSIVE MAPPING DATABASE OF PLANNED WIND FARM PROJECTS, NOW AVAILABLE OFF-THE-SHELF FROM ENHAR

As a professional involved in the wind energy industry, you will have a keen interest in knowing the precise location, size and ownership of the wind farm projects. You can collect information from diverse online sources, but most sources are not quality controlled and it is time consuming to track down the missing pieces of the jigsaw. How can you get the whole picture, not just anecdotal and incomplete information? As consultants to the renewable energy industry, Enhar are pleased to offer a professional grade product to fulfil this requirement:

Existing wind farms in Victoria are included, plus maps of all planned wind farms with development approval and under application

- Comprehensive, up to date database of all wind farm projects by Australian State
- Accurate and verified project boundary co-ordinates supplied in Google Earth and GIS compatible formats

Example of Wind Farm Boundary mapping: Wonthaggi Wind Farm, turbines shown in aerial photo

Enhar ABN: 17801749614

Business registered in Victoria B2031915S

Registered address: 420 Victoria St, Brunswick Vic 3056

Postal address: PO Box 298, Brunswick Vic 3056

- All projects planned by all developers are listed, subject to confidentiality limits defined below
- Database surpasses existing online sources due to inclusion of comprehensive project location boundary data and map
- Surpasses existing free sources including government databases which do not include co-ordinate details or accurate maps of project locations
- Database includes existing and under construction wind farms
- Victoria database fully researched and updated monthly
- South Australia, New South Wales, Queensland and Western Australia databases available on request
- The Enhar wind farm project database is complete and up to date, allowing you to
 - instantly map all wind energy sites
 - refine your site search and development plans
 - complete your wind energy market research
 - understand the future impact of wind farms on landscape, accurately
 - perform your spatial planning tasks

Purchase your copy of the database to receive

- Database geographic data in Google Earth and GIS compatible format
- Database spreadsheet

PRICE LIST - VICTORIAN WIND FARM MAPPING DATABASE

Universal License

Allowing you unlimited use of the database and map both internally within your organisation plus publishing of the map onto your website:

- **Gold : \$2,500 + GST** : includes updates for 6 months of all project additions and changes
- **Silver: \$2,000 + GST** : accurate at date of purchase

Local License

Allowing Internal Usage within your own organisation only:

- **Gold** licence includes complete database plus one 6-monthly update of all project additions and changes : **\$1,500 +GST**
- **Silver:** Complete project database accurate at date of purchase: **\$1,000 +GST**

Usage of Sensitive Data

We respect the confidentiality of Industry-sensitive information. Therefore, we do not list sites which are under investigation by developers which have to date not sought referral under the EPBC Act or for which a planning application has not been lodged with the planning authority to date. The sites which are included in the database are therefore the more advanced projects, with information already announced into the public domain. These are therefore the most relevant sites to assessment of the future wind energy landscape.
