## Win Grant Funding for Energy Projects

### Capability Statement

Are you keen to take advantage of grant funding to reduce the cost of energy efficiency equipment or renewable energy installation? Do you prefer to outsource the paperwork to experts who deal with grants on a daily basis?

#### We identify the latest grants and develop winning applications for you

We can assist clients with the preparation of applications to federal or state based grant funding schemes including ARENA projects. Our team is experienced in both government grant applications and renewable energy, therefore possess the ideal skills and knowledge for this task.

Independent reports are persuasive references for a successful grant application. Enhar provides feasibility reporting and Energy Audits to provide credible evidence towards funding requests.

#### Current Grants

##### Community Sustainability Infrastructure Fund - now open

An exciting new funding program has been launched in Sept 2014 by Sustainability Victoria. The "Community Sustainability Infrastructure Fund" is now open to support Victorian community groups, local government and Victorian businesses to achieve local sustainability goals. Enhar assists businesses and communities to plan projects and successfully win grant funding.

#### Business and Local Government

Victorian Businesses of any size are eligible to apply for 33% funding towards Energy efficiency improvements such as:

- optimisation of HVAC (heating, ventilation, air conditioning) systems
- lighting efficiency upgrades, timers and sensors
- compressed air leakage/pressure reductions
- upgrades or replacement of refrigeration or boilers
- installation of high efficiency variable speed drives.

There is no formal cap on the funding amount per project. Contact us to commence your project proposal ASAP – stay ahead of the queue.

Local Governments in Victoria can also apply for funding to investigate, develop and implement infrastructure projects that facilitate resource efficiency, including energy efficiency, energy from waste and more.

#### Communities and Non-Profit

Community groups, non-profits and Schools can apply for 50% Grants of up to \$50,000 to buy, install, commission or upgrade equipment or infrastructure to improve the sustainable energy performance (supply and efficiency) of community infrastructure. Energy efficiency upgrades to community buildings and renewable energy projects for community buildings, including solar are eligible.

***"Use Enhar to prepare your applications to the latest grant funding schemes."***

## Geelong Businesses – 50% rebate towards Energy Audits

Enhar is listed on the Geelong Energy Efficiency Service Providers List. This is the suppliers list for Level 2 Energy Audits published by Future Proofing Geelong. This listing means that businesses in the Greater Geelong area can apply for up to 50% funding towards the cost of a Level 2 Energy Audit from Enhar.

## Environmental Upgrade Financing: Affordable Repayments

For businesses within the City of Melbourne, a Level 2 energy audit from Enhar also enables you to access the low interest financing scheme from Sustainable Melbourne Fund (SMF). This financing enables tenants to collaborate with their building owners to upgrade the efficiency of their building and install solar. This creates lower bills for the tenants and increases the value of the building, all through an easy low interest repayment via the building rates.

For companies in Victoria outside the City of Melbourne, where progressive local governments wish to establish pilot Environmental Upgrade Agreement (EUA) projects, we work with businesses to lead the field by creating EUA projects together.

## Track Record of Successful Grant Funding Applications

Enhar has a proven record assisting industry to access the following Governmental funding programs:

- Clean Technology Investment Program (CTIP), we achieved over \$1.4M of approved grants with over 90% success rate.
- The Smarter Resources, Smarter Business (SRSB), capital grants and resource assessment funding; we have achieved over 75% success rate of approvals
- Local Government Energy Efficiency Program (LGEEP), solar feasibility studies.

## Solar Energy and Energy Efficiency Expertise

Our renewable energy experience encompasses rooftop solar both residential and commercial scale.

Through applying principles of environmental sustainability, sound science and engineering as well as profitability, Enhar assists clients to bring top class solar energy projects from concept to commissioning. Incorporating solar into our energy audits and grants is a popular option with our clients.

*We also perform the post verification to ensure the grant authority receives the required confirmation that project outcomes are achieved.*

*Using Enhar takes away the complexity of grants and maximises success.*
